

# John Paul Viado

Software Developer

Quezon City, Metro Manila | johnpaulviado20@gmail.com | 0951 698 5636 | viads.netlify.app

linkedin.com/in/jpviado | github.com/Viadsss

## Education

---

### Polytechnic University of the Philippines

Bachelor of Science in Computer Science (BSCS) - 4th Year in Computer Science

Sta. Mesa, Manila

Oct 2022 – present

- GWA: 1.23, Consistent President's Lister and DOST MERIT JLSS Scholar

## Experience

---

### Software Developer Intern

Department of Science and Technology (DOST)

Remote

July 2025 – Aug 2025

- Contributed to the LODI project by developing full-stack features using **Laravel**, **Blade**, **React.js**, and **Vue.js** serving government project documentation needs
- Refactored and organized codebase by separating Bootstrap and Tailwind examples into modular files, improving maintainability across Libraries, Forms, Feedback, and Tables sections
- Implemented File Upload, Contact, and Profile forms with dual framework support (React and Vue), ensuring consistency and proper validation

### Frontend Contributor

PUP The Programmers' Guild (PUP TPG)

Manila, Metro Manila

July 2023 – Dec 2023

- Developed and integrated the Info Page and Hero Page for the official organization website using **React.js**, **Next.js**, and **TypeScript**
- Improved content structure and accessibility for prospective members through enhanced UI components

## Projects

---

### Isko360

Jan 2024

Digital platform for PUP DOST-SEI scholars to submit and track documents

- Spearheaded backend architecture with **Laravel** and implemented all frontend interfaces using **React.js**, ensuring a cohesive and intuitive user experience
- Contributed to backend systems supporting reviewer workflows, helping streamline document verification and stipend processing
- Implemented live submission status tracking in React, enabling scholars to monitor approvals instantly

### HomeRoom

Jan 2024

Digital platform for managing housing and rental processes for landlords and tenants

- Led development of a full-stack rental management system using **Laravel**, helping landlords and tenants manage payments, records, and communication in one platform.
- Designed the database schema and implemented queued jobs, scheduled tasks, and a real-time chat, enabling billing automation, overdue updates, messaging, and file sharing

### Deparavia

Jan 2023

Healthcare management app for managing patient admissions and records

- Led core development with **Node.js/Express.js** and implemented **React.js** interfaces with secure logins and role-based access
- Developed features for managing patient data, admissions, and visits, ensuring usability and data integrity

## Skills

---

**Languages/Frameworks:** HTML, CSS, Javascript, Typescript, React.js, Vue.js, Bootstrap, TailwindCSS, Node.js, Express.js, Java, PHP, Laravel, Inertia.js, MySQL

**Tools:** Git, GitHub, Jest, Webpack, Vite, Postman, Figma

**Development/Concepts:** REST APIs, Authentication, OOP, Data Structures, Unit Testing, Responsive Design
