

John Paul Viado

Software Developer

Quezon City, Metro Manila | johnpaulviado20@gmail.com | 0951 698 5636 | viads.vercel.app

linkedin.com/in/jpviado | github.com/Viadsss

Education

Polytechnic University of the Philippines

Bachelor of Science in Computer Science (BSCS)

- Magna Cum Laude, DOST MERIT JLSS Scholar

Sta. Mesa, Manila

Oct 2022 – June 2026

Experience

Software Developer Intern

Department of Science and Technology (DOST)

Remote

July 2025 – Aug 2025

- Developed and maintained full-stack features for the LODI project using Laravel, Blade, React.js, and Vue.js, implementing reusable feature modules (File Upload, Contact, Profile) and refactoring the application into a scalable, modular architecture to improve maintainability.
- Built PDF report generation for the Balik Scientist Program (BSP), automating document output for program tracking

Frontend Contributor

PUP The Programmers' Guild (PUP TPG)

Manila, Metro Manila

July 2023 – Dec 2023

- Built and integrated the Info Page and Hero Page for the organization's official website using **React.js**, **Next.js**, and **TypeScript**, implementing reusable UI components for a consistent, scalable frontend
- Improved content structure and visual layout across key pages, making information easier to navigate for prospective members

Projects

Isko360

Jan 2026

Digital platform for PUP DOST-SEI scholars to submit and track documents

- Spearheaded backend architecture and database schema using **Laravel**, and built all admin-side interfaces with **React.js**
- Developed backend workflows for document verification and stipend processing, streamlining review and approval for reviewers

MeloBeats

Aug 2025

Web app for converting YouTube and Spotify videos, tracks, and playlists into MP3 files

- Built a full-stack media conversion platform using **React.js**, **TypeScript**, **Node.js**, and **Express.js**
- Implemented YouTube and Spotify track/playlist conversion with automatic ZIP compression for batch downloads
- Integrated Spotify API authentication via client credentials for secure metadata retrieval

HomeRoom

June 2025

Digital platform for managing housing and rental processes for landlords and tenants

- Led development of a full-stack rental management system using **Laravel**, enabling landlords and tenants to manage payments, records, and communication in one platform
- Designed the database schema and implemented queued jobs, scheduled tasks, and real-time chat, powering billing automation, overdue notifications, and file sharing

Deparavia

July 2024

Healthcare management app for managing patient admissions and records

- Led core development using **Node.js** and **Express.js**, and built **React.js** interfaces with secure login and role-based access control
- Developed features for managing patient data, admissions, and visit records, ensuring usability and data integrity

Skills

Languages/Frameworks: HTML, CSS, Javascript, Typescript, React.js, Vue.js, Bootstrap, TailwindCSS, Node.js, Express.js, Java, PHP, Laravel, Inertia.js, MySQL

Tools: Git, GitHub, Docker, Jest, Webpack, Vite, Postman, Figma

Development/Concepts: REST APIs, Authentication, OOP, Data Structures, Unit Testing, Responsive Design
